### **Important Health Warning: Photosensitive Seizures**

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people with no history of seizures or epilepsy may have an undiagnosed condition that can cause “photosensitive epileptic seizures” while watching video games. Symptoms can include light-headedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, momentary loss of awareness, and loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects. **Immediately stop playing and consult a doctor if you experience any of these symptoms.** Parents, watch for or ask children about these symptoms—children and teenagers are more likely to experience these seizures. The risk may be reduced by being farther from the screen; using a smaller screen; playing in a well-lit room, and not playing when drowsy or fatigued. If you or any relatives have a history of seizures or epilepsy, consult a doctor before playing.

## BEFRIENDING ANIMALS

Animals can be shy - be careful not to scare them off! Sing with them calmly and find the right tone to harmonize and befriend the animal. You cannot befriend adult animals until you learn to speak their language, so you may have to come back later.

## GUIDE BIRD

If you have befriended a bird it can guide you. Sing as loud as you can for a few seconds and the bird will come to you. Sing again and it will show you your next objective.

## SAVING

Your game saves automatically as you play the game. You can have three different save games which are accessed from the main menu.
