Emotes	Unavailable
Join (second player only)	Select “Switch to Multiplayer” (from the ‘Pause’ menu)
Slow Motion	Enter Gameplay settings (from the ‘Pause’ menu)
Screenshot	Capture button
Pause Menu	- button

Starting the Game

Save Slot

You have three save slots. You can view information about each of your saves in the menu. You can continue existing saves or select **START ANEW** to overwrite the data.

In co-op, progress will **ONLY** be saved in the slot picked by the primary player.

Joining

To switch to co-op, press any button on a second controller. To return to single player, go to the menu with the other player and select **SWITCH TO SINGLE PLAYER**.

If you want to play in co-op with a second Nintendo Switch™ Pro Controller or two Joy-Con™ controllers, start a level, open the in-game menu, and select **SWITCH TO MULTIPLAYER**.

Level Select

The story levels can be entered through the glowing portals **inside** the main room of the lighthouse. Jump into one to start the level. The levels are arranged sequentially from the bottom floor to the top floor.

Bonus levels are found in the areas **outside** the main room and are entered in the same way.

Saving

Progress is saved automatically between levels and at every checkpoint (indicated by the locations where the glowing spark waits for you).

Gameplay

You control two characters, even in single player. You can carry to merge them into one character for easy movement, or drop and switch between them when you need two characters to solve puzzles.

Grab the connecting yarn to swing from the other character. This will let you swing across much bigger distances than you could jump. You can also pull on yarn that you have tied to objects.

To make a yarn bridge, tie the yarn between two nearby attach points. A successful bridge will sparkle, meaning Yarny can walk on it or push objects over it. You can bounce on a bridge for extra height by jumping on it.

Ask for hints whenever you are stuck on a puzzle. The hint button shows you three increasingly specific hints.

If you are stuck in a platforming section, use slow motion to slow down time and make it easier to get through tricky sections.
